

# Career Opportunities

At ADIL we are always looking for enthusiastic professionals with all levels of experience who want responsibility in our Developments and Operations Improvement business

## Is this you? Have you got what it takes?

---

At ADIL you'll find technically and commercially exciting work in a dynamic environment, where you can achieve your potential and ambitions with continuous support from the management team. With the Company primed for further expansion there is extensive scope for you to join us and make any position your own. You'll find yourself part of a friendly team with the chance to undertake a wide variety of work. We can offer a broad range of projects dealing with leading industry names.

## Who are we?

---

ADIL is an independent consultancy focused on providing state of the art development and operations management support to the energy industry. Since the Company was founded in 2006, our experienced personnel have delivered a wide range of development and operations projects safely, on time and within budget. Through planned growth the Company has expanded to over 100 personnel – many with several decades of experience in the upstream oil and gas and the energy industries.

## Why join us?

---

At ADIL we are proud of our people-centred approach. We promote a constructive, open and honest interaction between our personnel and with our clients as a means of stimulating a positive and friendly environment where people want to work. We nurture expertise within the ADIL team with a strong organisational framework supported by tried and tested systems.

Many of our key staff have experience in the oil and gas industry, with operator or international experience. From the Company's foundation we have encouraged a strong entrepreneurial and innovative spirit backed by sound business and technical experience, professional integrity and safe working practices.

## Your development

---

ADIL supports the professional development of its staff and encourages everyone to develop their career and reach their full potential. ADIL has a proven track record investing in and developing its personnel.

# Career profile - Heather McEwen

Name: Heather McEwen  
Job Title: Project Engineer  
Qualifications: BEng Hons, MSc

"I left school and headed to Glasgow University to study mechanical engineering with product design. Once I graduated from Glasgow, I went to Cranfield University to study Offshore and Ocean Technology, my reasoning being that this would give me a detailed grounding and awareness of offshore engineering before applying for jobs and starting work. In my first couple of years in the world of work, I was exposed to the execution of projects, practical offshore experience and valuable training sessions. However, it was my curiosity as to how offshore fields developed from concept to installation that drove me to look for a different job and led me to ADIL."

"I spend time interfacing with discipline engineers, specialists and outside companies to bring together the best solution for whatever the project/problem may be. Currently, I am part of a team working to define the best solution for an offshore development."

"The best part of my job is working in a team where I am continually learning something new. Each person brings their own skills and experience and I enjoy working within this group to achieve technically sound and economical solutions to clients' problems/issues/concerns. I know it sounds silly, but there are no parts to my job that I consider terrible. Of course there are days when things don't go as planned and you find yourself back a few steps, but I don't think that is something solely linked to my job. On the days when things don't go according to plan, I try to look at how it affects other things and, if needs be, sit down and talk it through with the boss."

"I am always given great support and career development opportunities. The company also provides me with the chance to experience the many different facets of the firm, as opposed to being pigeon-holed."
